

**Mosquito Magnet Defender:**

**Item No.: 900030010X**

**0.5  
Acres**

**For Light Infestation**

Constructed of high quality plastics and covering half an acre, the Mosquito Magnet™ Defender is ideal for the homeowner with light infestation.

**Price: £ 450.00** (\*Price includes VAT)

**UK Shipping Charge: £ 20.00** Per Unit

(Mosquito Magnet also known as Midge Magnet in the UK)

The **Mosquito Magnet® Defender** is easy to use—just plug it in, push the button, relax and enjoy your yard!

A 50-foot, 12-volt power cord, supplied with the **Mosquito Magnet® Defender trap**, allows placement away from the family area yet near the mosquitoes' breeding and resting areas. Lawn clips are provided to help secure your power cord. Through proper placement upwind, biting insects will be drawn to the trap; thereby reducing the chances of you becoming their target. The heavy-duty plastics and marine grade materials make it ideal for harsh environments.

The enhanced **Mosquito Magnet® Defender** mosquito trap has been designed for the homeowner who needs to protect up to a ½ acre area. For optimal results, run your trap 24 hours a day in order to break the breeding cycle of the Mosquitoes in your yard. Your trap will begin working immediately with noticeable results in 7-10 days. Allow a 4 week time frame to see significant results.

**Defender Features:**

- Up to 0.5 acre coverage
- Quick start up
- Small, easy to empty net
- All-weather durability -
- 50' low-voltage flex. Burying clips included
- Easy to use
- Comes with 1 nets / 1 Octenol tablet
- Dual CO2 + Octenol attractant strategy.

**Construction:** Hi grade all-weather materials throughout.

**Power Source:** Self-powered, hybrid power system consists of thermoelectric module & NIMH battery, propane to create CO2 (Propane not included. Recommended tank size: Standard 11 or 13 kg tank)

**Maintenance:** Refill propane tank and replace Octenol cartridge every 21 days. Empty net when half full.

**Size:** 40 x 33 x 22 inches (box)

**Patented Counterflow™ Technology**

**1. Lures**

The Mosquito Magnet® operates 24/7 by releasing a continuous stream of carbon dioxide (CO2) and scientifically proven attractant to draw mosquitoes to the trap.

**2. Captures**

With our patented Counterflow™ Technology, mosquitoes are vacuumed into a net where they dehydrate and die.

**3. Controls**

The Mosquito Magnet® is scientifically proven to disrupt mosquito breeding cycles, virtually eliminating the nuisance and danger of mosquitoes in your yard all season long.
